multi abject detection

Quote

Safety depends on what I see — and what I don’t miss.”

Goals and Needs

- Monitor CCTV cameras efficiently
- Detect suspicious objects or activities quickly
- Ensure safety of people and property
- Reduce workload during long monitoring hours
- Real-time multi-object detection system
- Automatic alerts for unusual or risky objects
- Simple and easy-to-use interface
- Clear visual output (bounding boxes and labels)

Bio

Role: Security Guard

Age: 40

Pain point (frustrations)

- Cannot continuously watch multiple screens at once
- High chance of missing important events
- Manual monitoring is tiring and stressful
- Slow reaction time without automated alerts
